# Opportunities

The screenshot shows the naukri.com website interface. At the top, there's a navigation bar with links for Jobs, Recruiters, Companies, Services, More, and Login. Below this is a category bar with options like All Jobs, IIT/IIM Jobs, Govt. Jobs, International Jobs, and Walk-in Jobs. The main search area has a search bar with the text 'natural language processing', a location dropdown, an experience dropdown, a salary dropdown, and a 'Search' button. Below the search bar, there's a section for 'Find Jobs For' with a list of designations: Advanced Software Engineer, Analyst Developer, Scientist B, and Module Lead. The search results show '1-50 of 489 Natural Language... Jobs' sorted by 'Relevance'. The first result is for 'Natural Language Processing/ Algorithm Development Engineer' at 'Excelra Knowledge Solutions' in 'Hyderabad' with '4-9 yrs' experience. The key skills listed are 'C, Natural Language Processing, C++, NLP, Python, Machine Learning'.

# Opportunities

The screenshot shows the LinkedIn Jobs interface. The search bar contains 'natural language processing' and the location is set to 'India'. The results are sorted by 'Relevance'. The first job listing is for 'Senior Speech Scientist' at Amazon, Bangalore, IN. The description mentions 'Automatic Speech Recognition (ASR), Natural Language Understanding (NLU), and Audio Signal Processing'. The second job listing is for 'Research Director - Artificial Intelligence' at Accenture, Bengaluru Area, India. The description mentions '18+ years of experience in machine learning, natural language processing, knowledge Representation, Compute'.

### Machine learning - Wikipedia

[https://en.wikipedia.org/wiki/Machine\\_learning](https://en.wikipedia.org/wiki/Machine_learning) ▼

**Machine learning** is a field of computer science that gives computers the ability to learn without being explicitly programmed. Arthur Samuel, an American pioneer in the field of computer gaming and artificial intelligence, coined the term "**Machine Learning**" in 1959 while at IBM.

[Machine learning](#) · [Machine Learning \(journal\)](#) · [Timeline of machine learning](#) · [H2O](#)

- Reducing human/machine efforts required to perform a task (time optimization).
- Increasing the performance of a task (efficiency optimization).
